Beside
ERP Solutions

BESIDE · END-TO-END FACTORY MANAGEMENT

Beside every production

No production hour should turn into wasted cost

Agenda

1. 5 things you get from Beside Lite
2. One system for the whole factory
3. Documents linked from sale to cost
4. Working screens and dashboards
5. Ask the system through Claude and ChatGPT
6. Path to go-live

5 things you get from Beside Lite

1

See every machine on the floor instantly

Machine Monitoring · Downtime

Know why a machine stopped, without waiting for month-end

2

Know the actual cost of every work order

Job Cost Sheet · Margin Analysis

See actual cost and profit for each work order

3

Know where every job stands, queued by machine

Work Order · Production plan dashboard

Queue work orders by machine and shift and see if orders will be met

4

Trace quality back through every lot

Quality Control · COA · Batch Tracking

Review the history and inspection results of any lot at any time

5

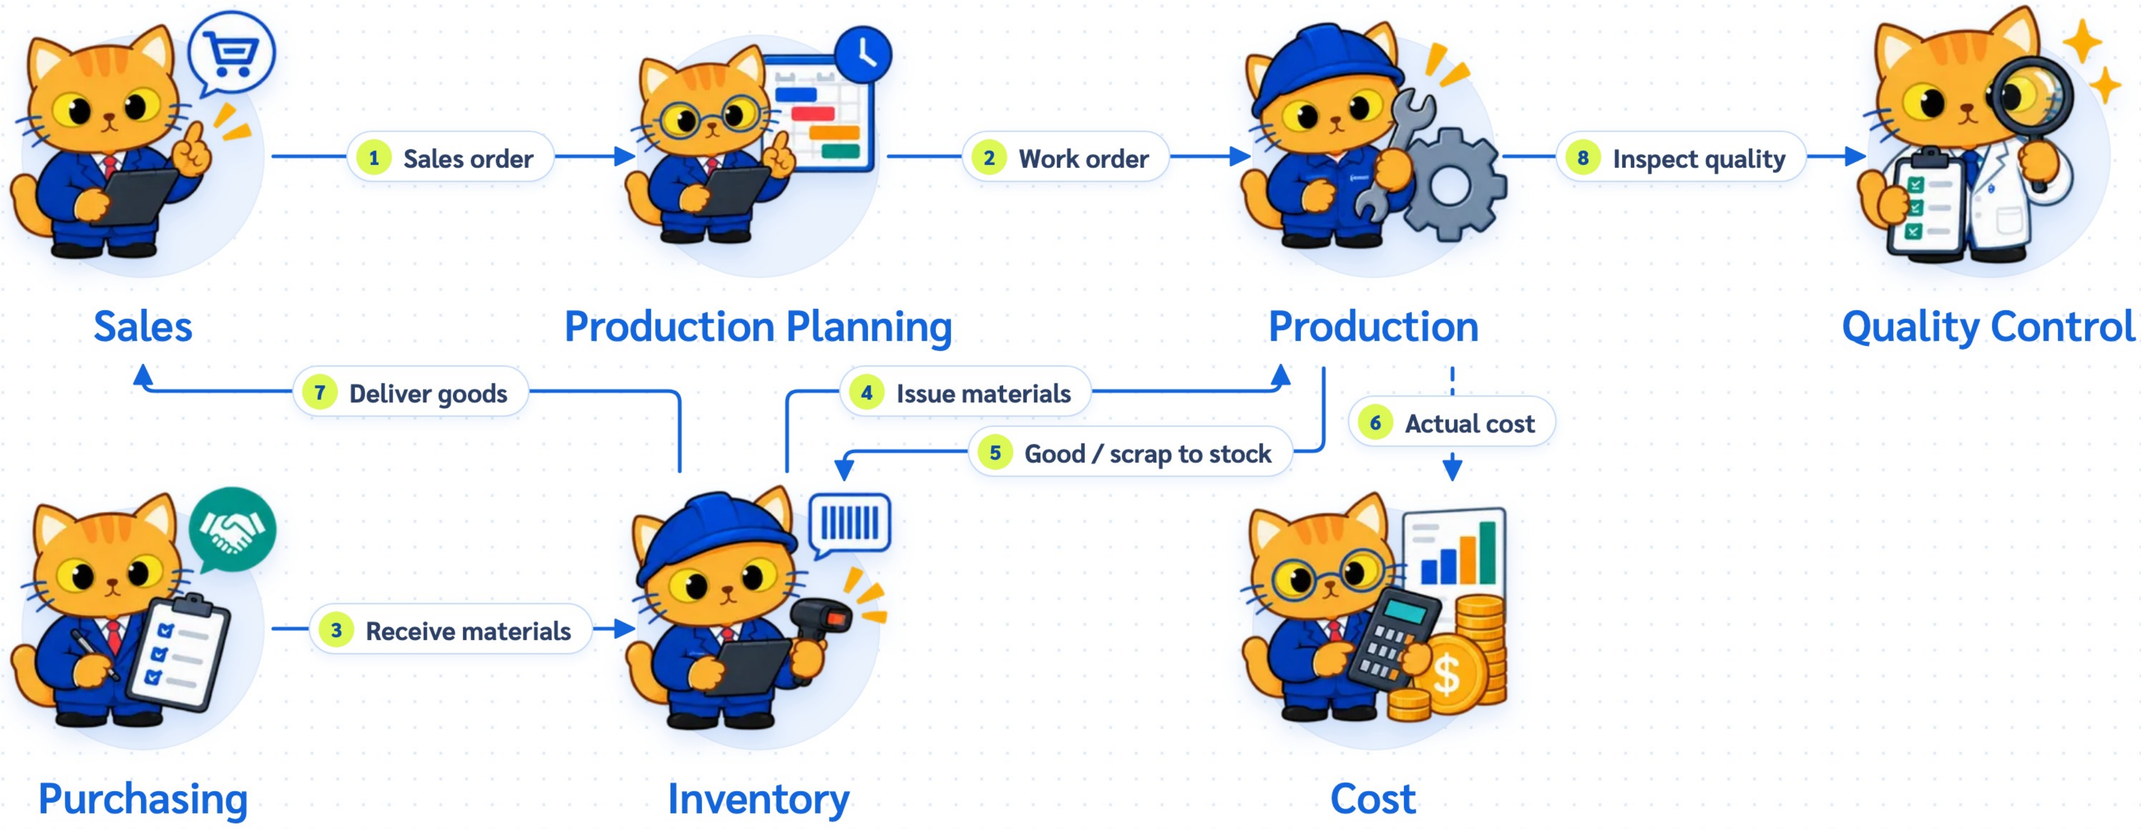

Never short, never stuck

Stock Balance · Idle Material

See the whole warehouse on one screen and which items sit idle

One system, the whole factory

Every document connected, from quotation to actual cost

Analysis screens for management

- Scrap Pareto
- Stock Overview
- Idle Material
- Job Cost Sheet
- Back Order

Add-on · Beside Mobile floor scanning

FEATURES · by program

Features

Every Beside Lite feature, in the order work flows through the factory — from master data to the warehouse

1 Master Data
Master data

- Item Master
- Business Partner
- Machine
- QC Spec

Set master data once, use it in every document

2 Costing
Cost

- Actual Cost
- Job Cost Sheet
- Margin Analysis

Know the actual cost of every work order

3 Planning
Planning

- Work Order
- Working Shift
- Bill of Materials (BOM)
- Routing

Queue work orders by machine and shift

4 Production
Production

- Machine Monitoring
- Product Receipt
- Downtime
- Material Request
- Material Issue
- Barcode Tag

See every machine on the floor in real time

5 Quality Control
Quality control

- QC Properties
- Product Specification
- QC Inspection
- Quality Check Sheet
- Certificate of Analysis (COA)
- Scrap Reason
- Scrap Receipt
- Scrap Tag

Trace quality back through every lot

6 Inventory
Warehouse

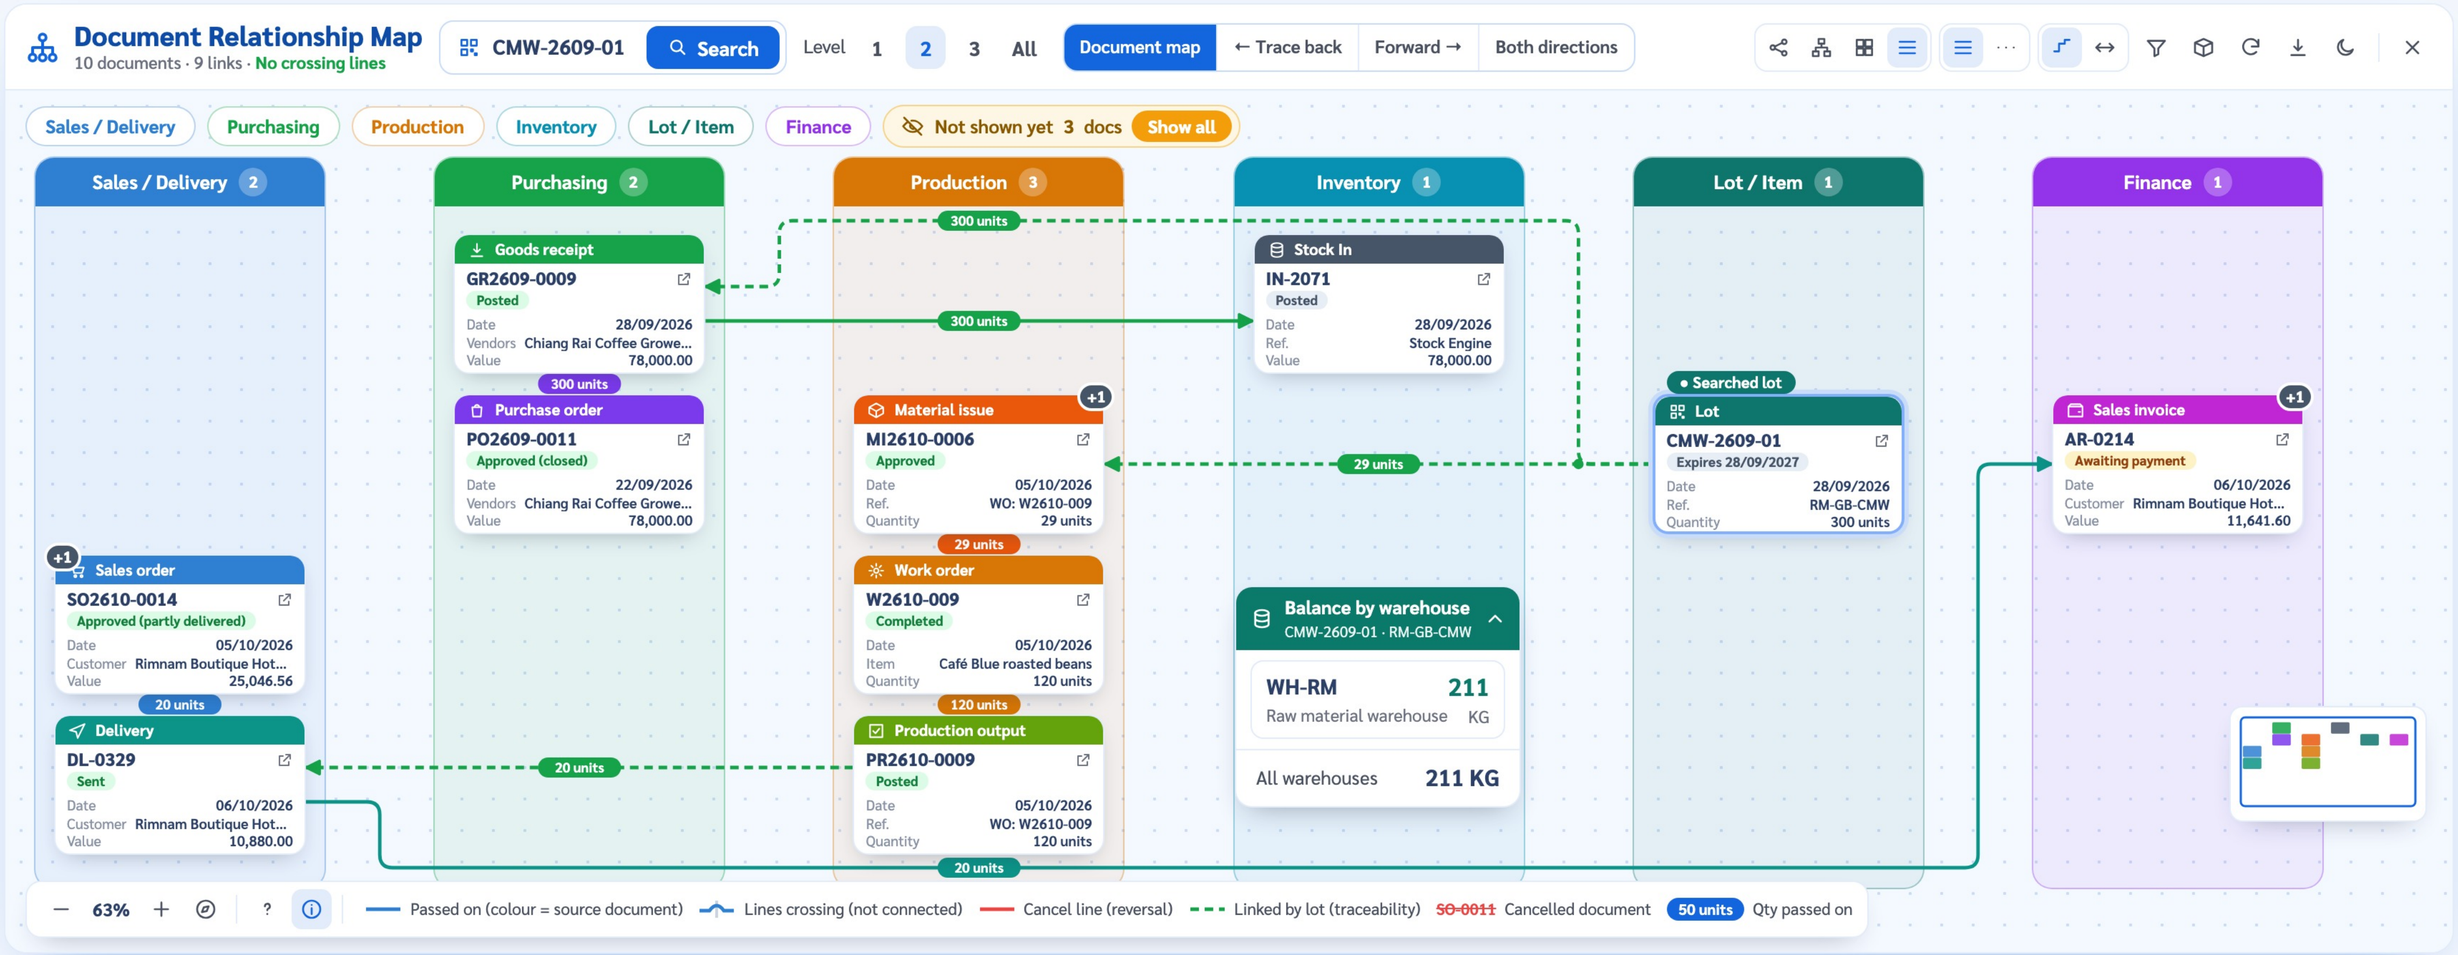

- Warehouse
- Stock Requisition
- Stock Transfer
- Permission Transfer

Issue and transfer by permission, stock always checkable

DOCUMENT FLOW · LOT TRACEABILITY

Document Relationship Map

A map of every document tied to one lot, from the raw-material PO to the delivery note. Enter a lot number and see the whole chain

Purchasing

Know which purchase order a lot came from

Type a lot number and see the source PO and goods receipt at once

Production · QC

Trace back which jobs a raw-material lot went into

From the lot to material issue, work order and product receipt

Sales · Management

Tell a customer which lot was shipped to whom

Forward to delivery and invoice, in one map

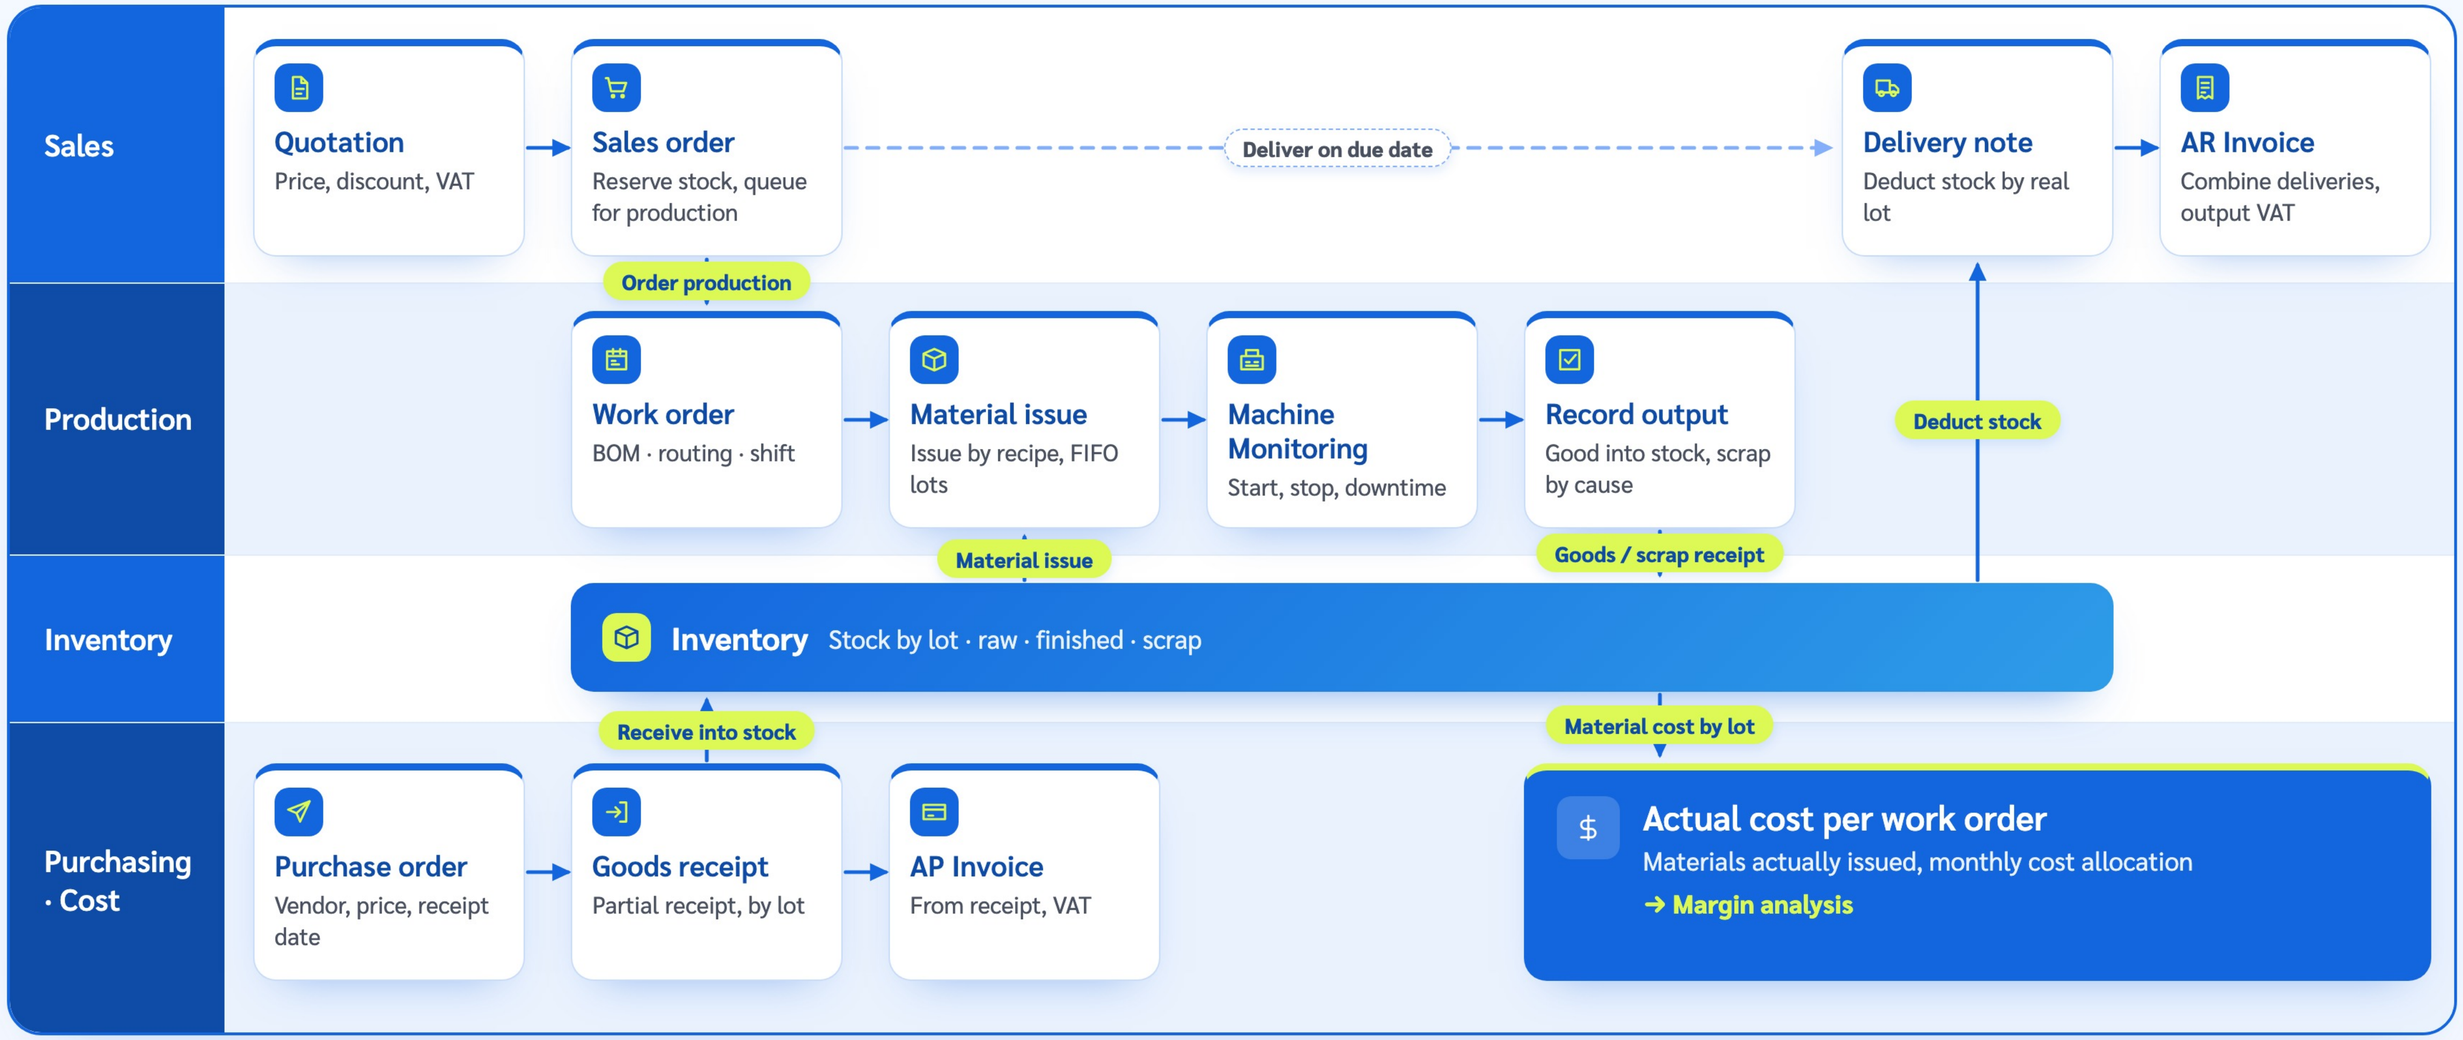

Mock-up of the real system · sample coffee-roastery data

BESIDE

FLOW · SALES → PRODUCTION → PURCHASE

One sales order, through every department

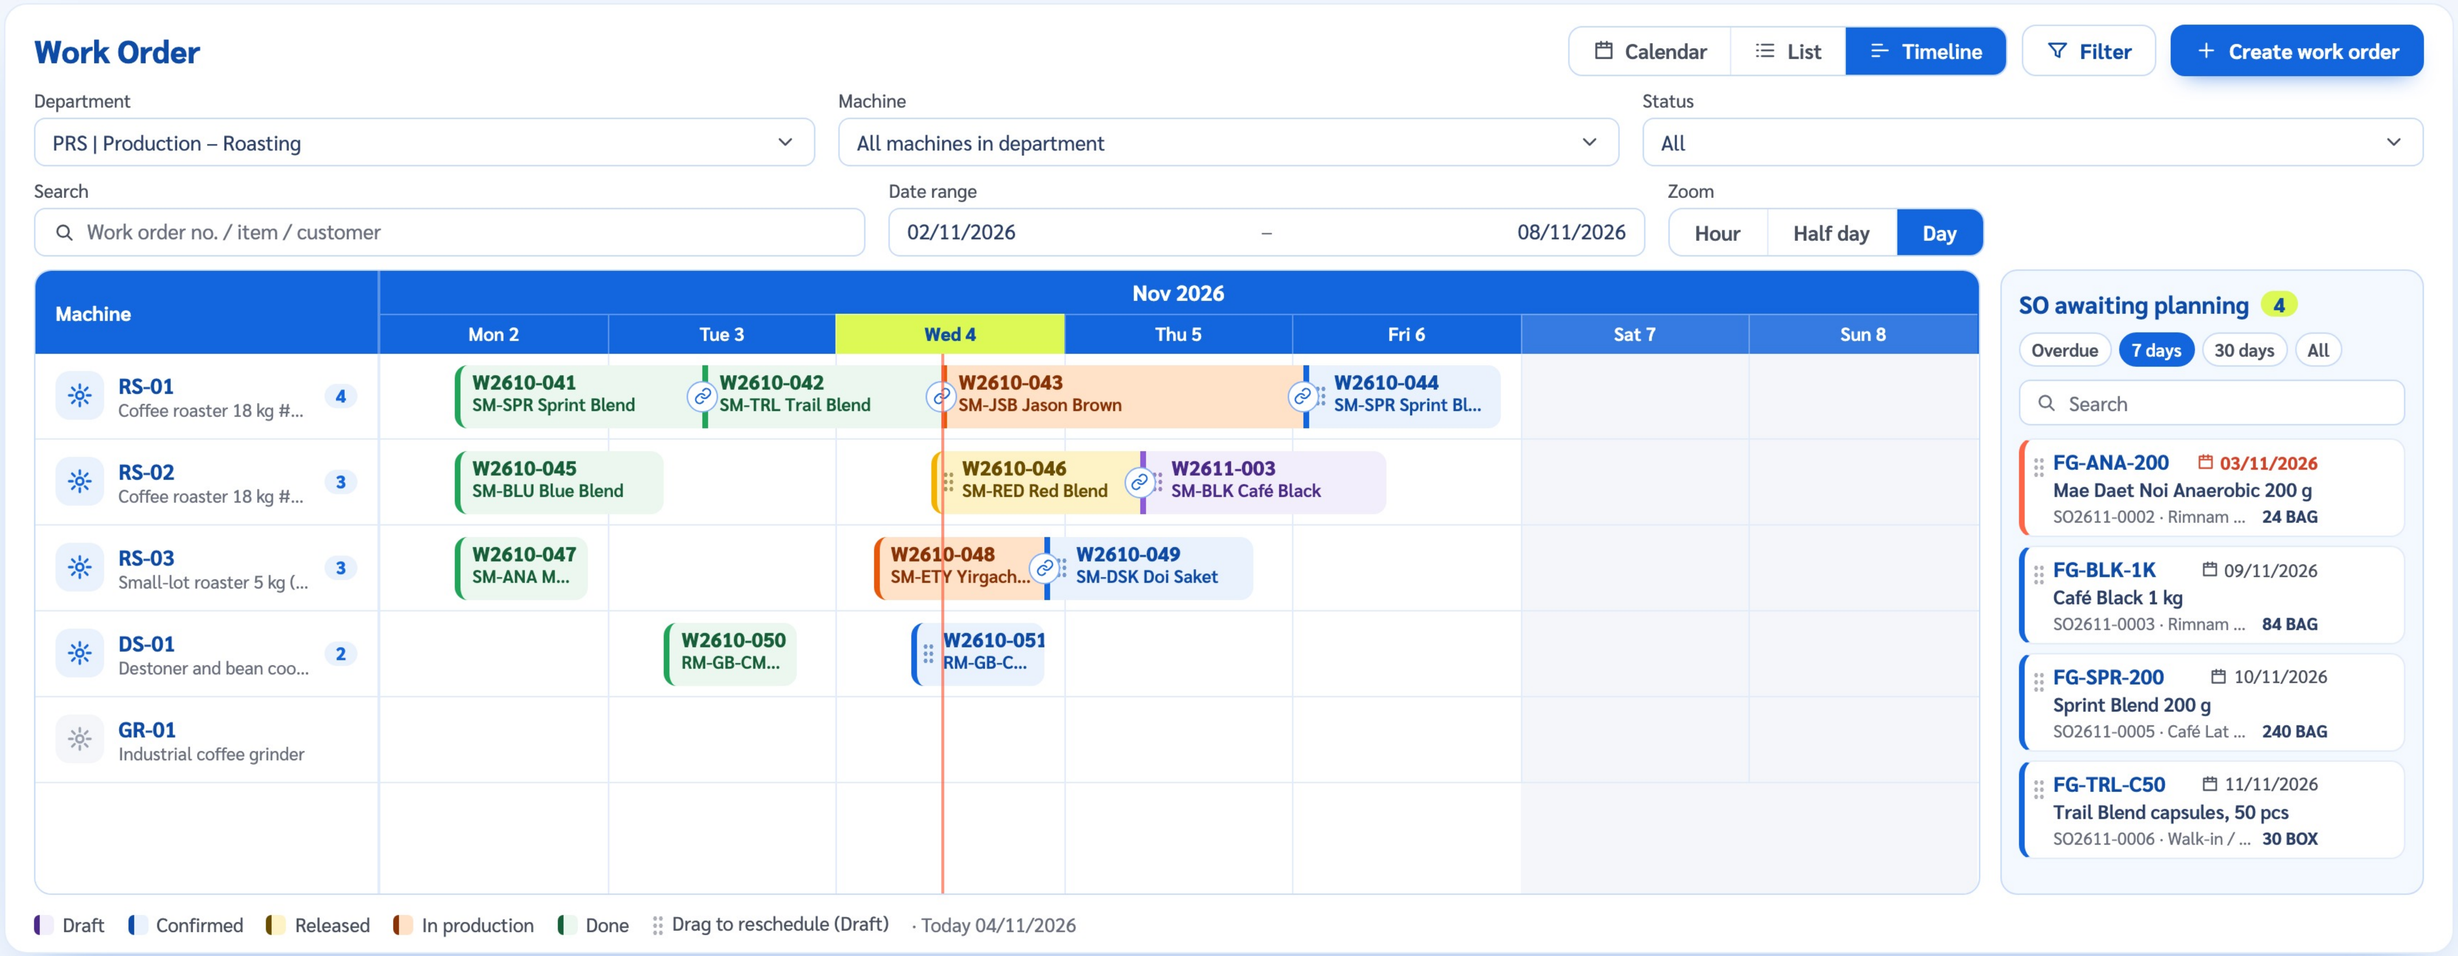

Sales, production, inventory and purchasing share one document chain, all the way to actual cost

PLANNING · WORK ORDER

Work Order Planning

Schedule work orders by machine and day. Drag a waiting sales order onto a machine and the system creates the work order

Planning

See every machine queue on one screen

Drag an SO onto a machine, a Draft order chains on automatically

Production supervisor

Know which machine is free and which is full

Colours show status: draft, confirmed, released, in production, done

Sales

Tell customers when the order will be ready

Chained orders shift together when you reschedule

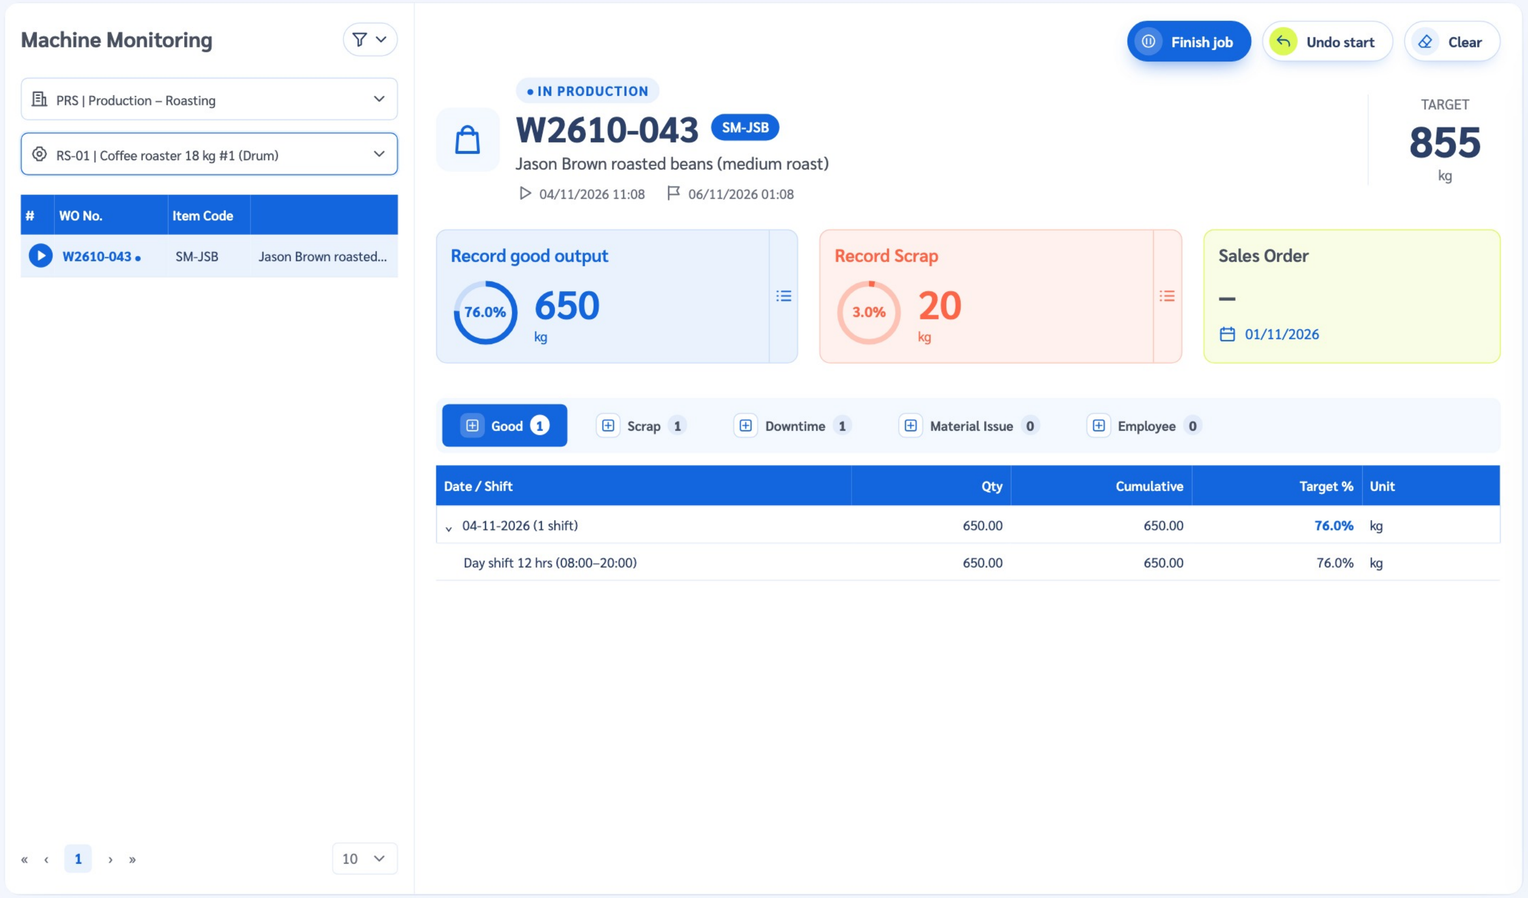

Mock-up of the real system · sample coffee-roastery data

BESIDE

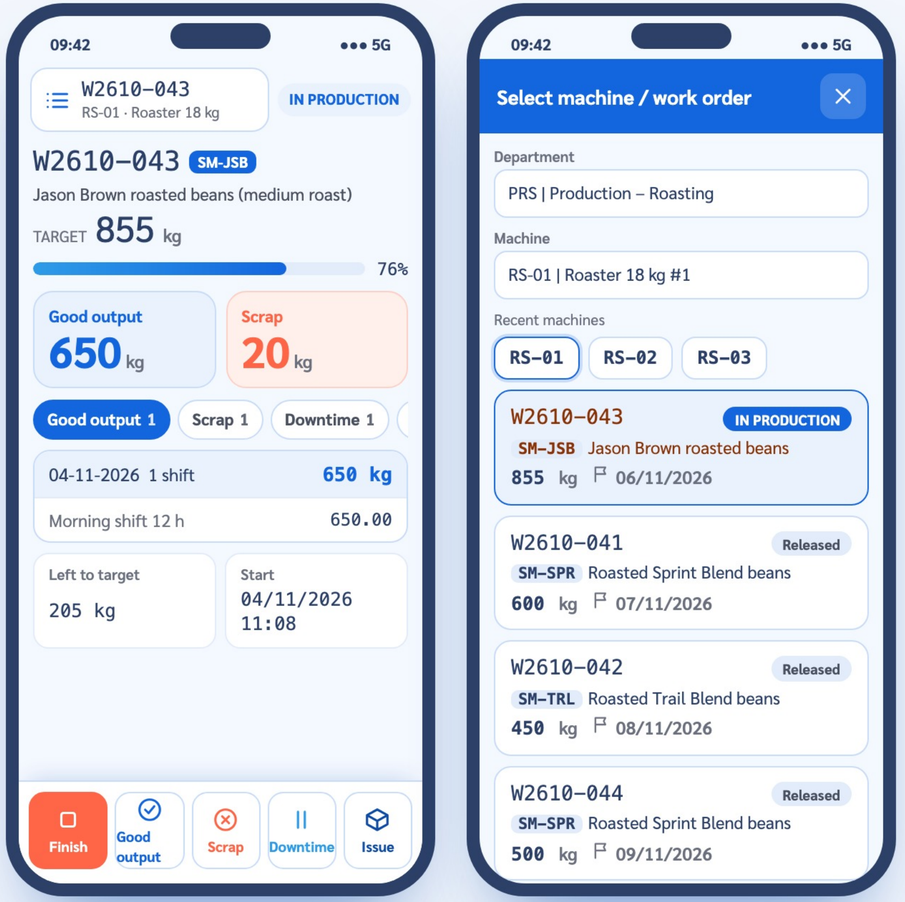

PRODUCTION · MACHINE MONITORING

Machine Monitoring

On a computer

On a phone · opens automatically on a mobile screen

Machine operator

Record everything on one screen, no paper

Start, good output, scrap, downtime, material issue

Production supervisor

Know where every job stands, right now

Output vs target, scrap and machines stopped now

Management · Costing

Actual cost per work order

Issued materials flow into the Job Cost Sheet automatically

Mock-up of the real system · sample coffee-roastery data

BESIDE

PRODUCTION · DASHBOARD

Production Dashboard

Compare the plan with actual output by machine: are we on plan, and which work orders are late?
Updated in real time

Production Plan Dashboard

BESIDE

PRODUCTION 3 · SCRAP

Scrap Pareto

Shows which causes create the most scrap, valued in baht, so you fix the most worthwhile causes first (the 80/20 rule)

Scrap Cause Summary

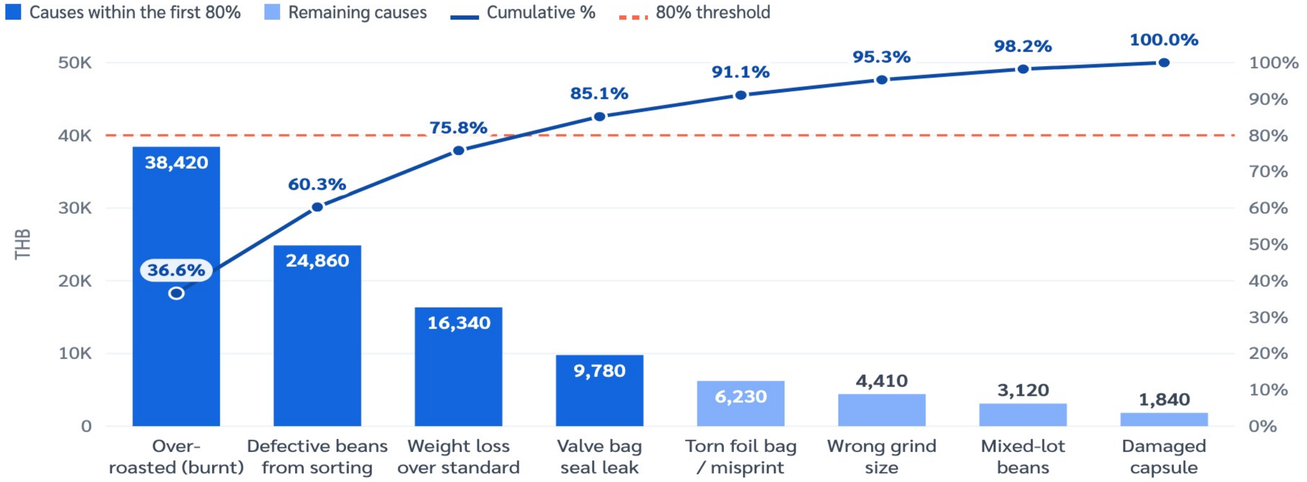

Search | Print report | Clear

Department * Roasting Production | Machine code All | Start date 01/10/2026 | End date 31/10/2026

Total scrap	Occurrences	Causes	Period
105,000.00 THB	47 times	8	31 days

01/10/2026 - 31/10/2026

Pareto Chart — cumulative scrap by cause

Scrap cause table

Causes within the first 80%

No	Cause	THB	%	Cumulative
1	Over-roasted (burnt)	38,420.00	36.59	36.59
2	Defective beans from sorting	24,860.00	23.68	60.27
3	Weight loss over standard	16,340.00	15.56	75.83
4	Valve bag seal leak	9,780.00	9.31	85.14
5	Torn foil bag / misprint	6,230.00	5.93	91.08
6	Wrong grind size	4,410.00	4.20	95.28
7	Mixed-lot beans	3,120.00	2.97	98.25
8	Damaged capsule	1,840.00	1.75	100.00
	Total	**105,000.00**	**100.00**	

By department (Pareto)

Roasting Production	87,150 THB (83%)
Packing Production	17,850 THB (17%)

By cause type

Roasting process	54,760 THB (52%)
Materials	27,980 THB (27%)
Packaging	17,850 THB (17%)
Machine setup	4,410 THB (4%)

Business meaning

Insight

The no. 1 cause is Over-roasted (burnt) at 38,420.00 THB (36.6%). Fixing the top 4 causes would eliminate 85.1% of scrap, worth 89,400.00 THB.

Production supervisor
Knows which cause to fix first
Top 4 causes = 85.1% of scrap; fix dark bars first

Plant manager
Sees the loss in money
Halving the top 4 causes saves 44,700.00 THB

Management
Assign an owner in the morning meeting
Roasting 83% · Packing 17% of value, split by dept

PRODUCTION · DOWNTIME

Pareto Downtime

Shows what stops machines the longest, converted to time and lost value, so you fix the biggest time losses first

Downtime Cause Summary

Search | Print report | Clear

Department * : PRS | Production – Roasting

Machine : All

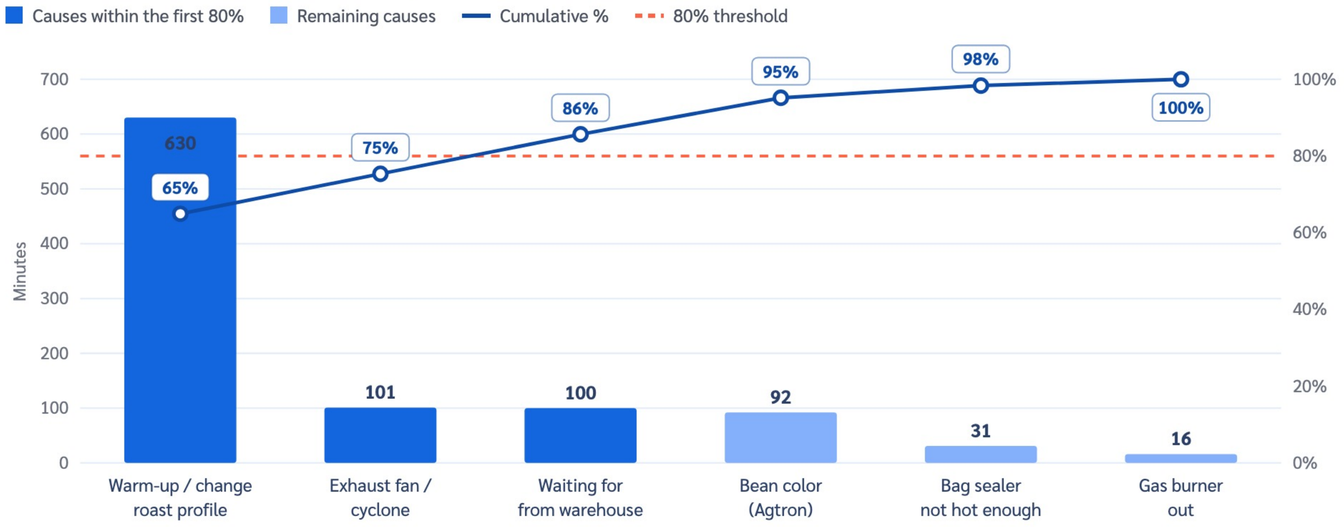

Start date : 01/10/2026

End date : 04/11/2026

Total downtime	Equivalent hours	Causes	Loss value
970 Minutes	16.17 hr	6 causes	6,728.42 THB

01-10-2026 → 04-11-2026

Pareto Chart — Cumulative downtime by cause

Downtime cause table

Causes within the first 80%

No	Downtime cause	Minutes	THB	%	Cumulative %
1	Warm-up / roast profile change	630	4,386.25	64.95	64.95
2	Exhaust fan / cyclone	101	652.21	10.41	75.36
3	Waiting for green coffee from warehouse	100	692.17	10.31	85.67
4	Bean color failed (Agtron)	92	702.50	9.48	95.15
5	Bag sealer not hot enough	31	166.62	3.20	98.35
6	Gas burner out	16	128.67	1.65	100.00
	Total	**970**	**6,728.42**	**100.00**	

Production supervisor

Know which problem to fix first

The top 3 causes take 85.67% of all downtime
